OBJECTIVE -

Motivated IT student seeking an internship opportunity to apply technical skills in full-stack development. Eager to contribute to real projects, collaborate with teams, and gain professional experience in modern development environments.

TECHNICAL SKILLS

Programing language: Java, Javascript, Typescript, Python

Framework/Tools: Spring Boot , Django, Node.js, RESTful API

Frontend: HTML, CSS, Angular, Responsive Design

Databases: MySQL, PostgreSQL, MongoDB

Tools & DevOps: Git/GitHub, Docker, Postman

PROJECTS

Online Food Ordering

1/2025 - 3/2025

Back-end Developer - Personal project

- Designed and developed an online food ordering system: product management, shopping cart, and order payment.
- Backend: Built RESTful APIs with Spring Boot, Spring Security, and JWT; integrated with MySQL.
- Frontend: Implemented a basic user interface using HTML, CSS, and JavaScript.
- · Deployed the application using **Docker**.
- Tech stack: Spring Boot, MySQL, Docker, HTML/CSS/JS.

Gym-Website-Management

10-2023 - 11-2023

Back-end(Django) + Front-end - Learning Project

- Participated in building a gym management system: managing memberships, attendance, and transactions.
- Backend: Developed APIs to handle business logic with Django.
- Frontend: Built a basic interface with HTML/CSS and integrated with backend APIs.
- Implemented login/registration functions and role-based access.

Developed admin pages for account and data management.

• Tech stack: Django, MongoDB, Node.js, HTML, CSS, SQLite.

E-commerce Cosmetics Website (In process)

8/2025 - Present

Fullstack ((Learning & Personal Project) - Personal Project

- Designed an e-commerce architecture: product management, shopping cart, order handling, and payment features.
- Built RESTful APIs with **Spring Boot** and **JPA/Hibernate** (in progress).
- Integrated OAuth2 + JWT + OTP for user login/registration, authentication, and role-based authorization.
- Frontend: Developed with Angular product catalog, shopping cart, and responsive UI.
- Database: Managed relational data using PostgreSQL; deployed with Docker.
- Status: In development (expected completion: 11/2025).
- Tech stack: Spring Boot, Angular, PostgreSQL, Redis, Docker.

EDUCATION

2021 - expected in 2026

Information Technology

Dong Nai technology university

- · Gained knowledge in programming, databases, web application development, and system fundamentals.
- Participated in team projects and technology workshops (Al, Cloud, DevOps).
- Developed teamwork, requirement analysis, and problem-solving skills.

ACTIVITIES

2022 - 2024

Programming Club

MemBer

- Organized and supported workshops on AI and technology.
- Mentored junior students in basic programming.
- Participated in internal coding contests within the club.

INTERESTS

- Reading articles and staying updated on new technologies, especially topics related to AI.
- Solving coding challenges on LeetCode and Codeforces.
- Exploring and experimenting with new technologies.

ADDITIONAL INFORMATION

- Own a personal laptop, able to manage time flexibly for internships.
- Eager to learn new technologies and adapt quickly to job requirements.
